

I am asking you not to expand Low Power FM stations. To do so would interfere with my reception of Air 1 radio. Air 1 radio fills a void in my community by offering a positive alternative to the filth that is currently on the radio. My children cannot listen to most stations because of the filthy lyrics or suggestive comments of the radio hosts. We don't have that problem with Air 1. If you expand the broadcasting of the LPFMs and in so doing inhibit reception of Air 1, you're taking away a valuable asset to my community. Young people do love music and if there is not a positive alternative to what is currently out there I'm afraid we will see a further decline in morals and values. I seriously hope you will consider this before making your decisions. Thank you.
